Hi, I'm Bog Frog with an Eco-Auto tip.	00:01
	00:03
Its amazing how a ten dollar hose can disable your \$25,000 vehicle. What's even more amazing is how it always seems to fail at the worst time.	00:03 00:14
I'll be back with a tip to help you avoid a potential disaster after this message from one of my Frog Friendly friends.	00:14 00:23

00:38

It's a good idea to inspect  
your hoses once a month  
and before long trips.

00:38

00:43

Check them when they're  
cool by squeezing them  
with your fingers and  
thumb near the end of the  
hose.

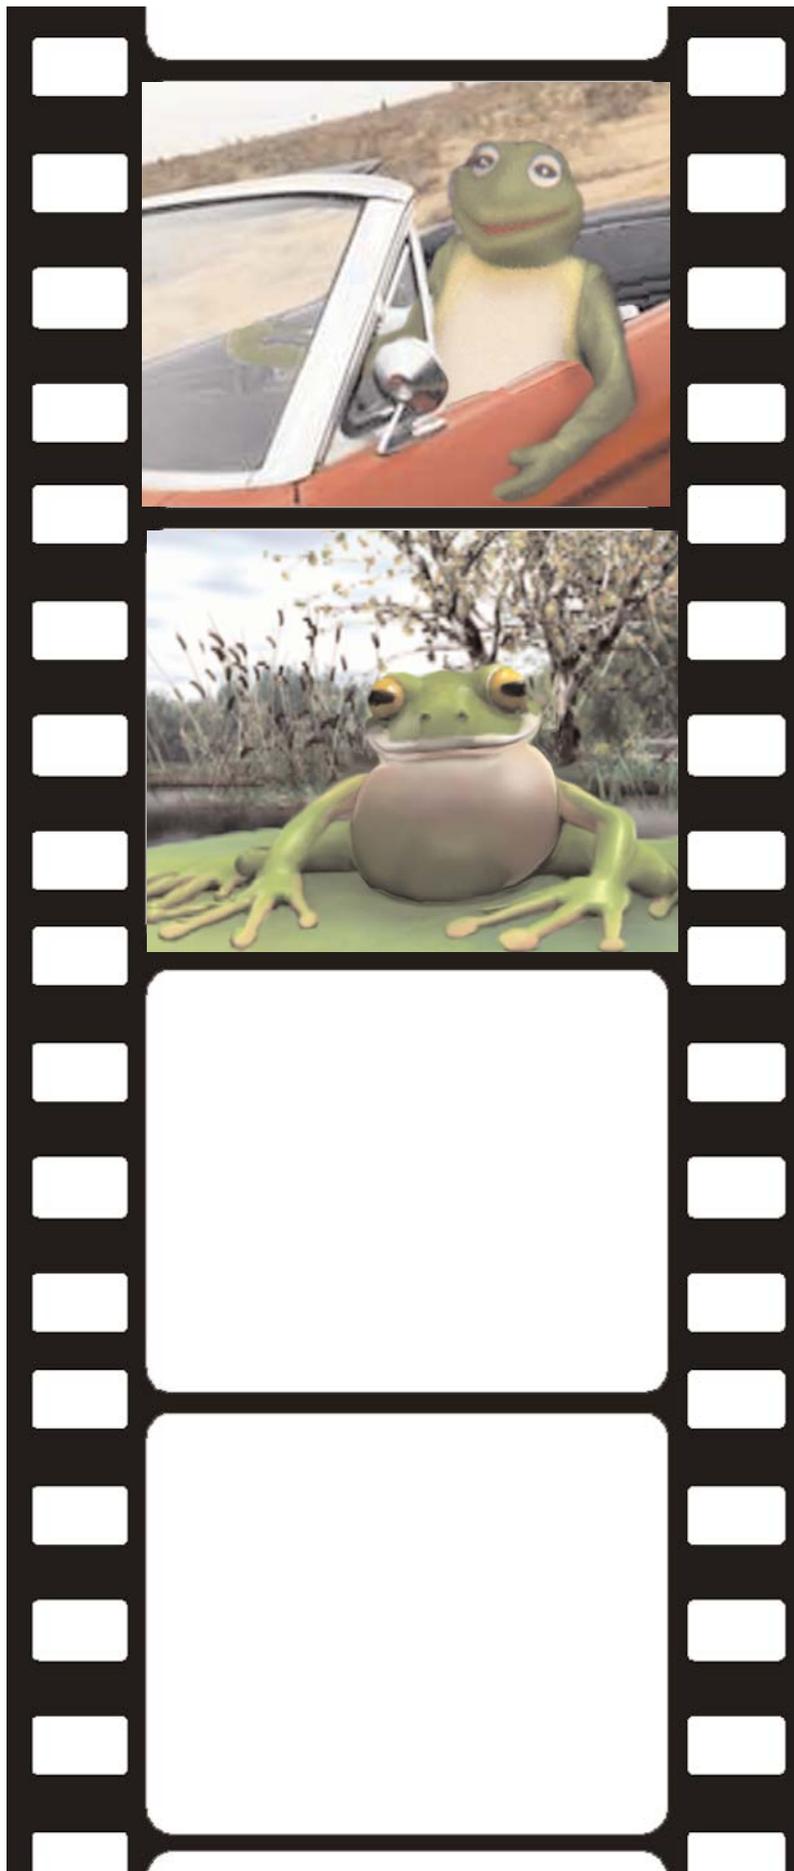

00:43

00:49

If the ends are soft and  
spongy, cracked or bulging  
then replace the hose.
